

Memory for Water Supply Project in

# Teshil Murree

District Rawalpindi, Province Punjab

## Closing Ceremony

at Government Facility of Punjab In Murree

**24<sup>th</sup> May 2012**

**Japan Mine Action Service**

## Message from Chairman of Japan Mine Action Service (JMAS)

I am very glad to congratulate closing ceremony of Water Supply Project in Murree with Pakistan people and Japanese people.

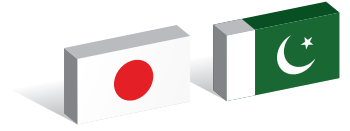

Water supply project in Murree has been sponsored by Government through Japan Mine Action Service (JMAS) since 2009. The project was implemented 5 villages where were in village Kakrai, Badhiar, LussKhotar, Gahel and Sihanna. 3 main-tanks and 22 sub-tanks which include repairable tanks were built and repaired by this project. And this project was providing total around 31 km water pipelines. About 10 thousand people were got benefit by this project directly. Especially, According to the result of our survey, I am happy to hear that women was reduce the time for bringing water and a number of villagers who came back to own village are increased by the project. The bosom of Pakistani family is very important, like Japanese culture, and do not substitute for anything to them so, I am glad to help them under the culture.

These projects could be implemented successfully, because residents who are living in project area desire to succeed in the project and I am sure that all attendances of this ceremony supported the project. Particularly, I would like to express appreciation to Mr. Shahid Khanqan Abbasi, Member of National Assembly. He has given us support and advice from beginning of the project. As all attendance knows, this facility is operated by Government of Punjab so I would like to express great appreciation to Mr. Charif, Chief Minister of Panjab. Our National Staff always said that Japan is one of most friendly nations for Pakistan so that they are glad and proud of our projects as staff of Japanese NGO because they are contributing to our brother's country.

This KIZUNA which mean deep and great tie between Japan and Pakistan had been built for long time so I would like to show respect and honour to persons who had been contributing and making effort to relationship between Pakistan and Japan. When I was working at Japan Self Defence Forces as Chief of Staff, Joint Staff Office and visited Murree as official visit in September 2005, Pakistani Army escorted me. It is very good old memory and my heart is full when I visit here again as Chairman of JMAS.

I wish water facilities which are provided by us will be maintained and treasured by the people of Pakistan forever as like a bridge of friendship between Japan and Pakistan.

**Hajime MASSAKI**  
**Chairman of JMAS**  
**(Rt). Gen, Chief of Staff JSDF**

## Message from Ambassador of Japan to Pakistan

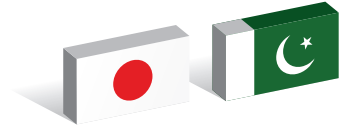

I would like to congratulate the Government of Pakistan, Punjab Province, the people of Murree, and the Japanese NGO Japan Mine Action Service (JMAS) on the completion of the project to provide safe drinking water to the rural areas of Murree.

Since 2009, JMAS has implemented with the Japanese grant, the three projects of constructing or repairing water tanks and water pipes for the peoples in the villages of Kakrai, Badihar, LussKohtar, Gahel, and Sihanna. And especially in the current project, JMAS has transferred expertise and skills to maintain water supply system. The project aims at reducing acute water shortage in the rural areas of Murree by directly providing clean drinking water and therefore contributing to saving the valuable time of the local residents, who had to fetch water from far-flung areas.

I would also like to extend my sincere appreciation to the local residents of Murree for their kind cooperation, without which this project would not have achieved the same status as it has today. Further, I would like to request the people concerned to use their skills and expertise to sustainably manage and maintain this water supply system for the benefit of the local community.

This is an ideal opportunity for me to mention the 60th Anniversary of the establishment of diplomatic relations between Pakistan and Japan. On such occasion, I would like to highlight both the Government of Pakistan and of Japan for their significant and continuous efforts to maintain and strengthen the existing friendly relations between the peoples of Pakistan and Japan. I can assure you as a friend of Pakistan that Japan will continue to support Pakistan as a major development partner. We also hope to provide assistance to the people of Pakistan to improve their living standards for a better and brighter future.

**Hiroshi Oe**  
Ambassador of Japan to Pakistan

## Message From Member, National Assembly Mr. Shahid Khanqan Abbasi

Shahid Khaqan Abbasi  
Member  
National Assembly of Pakistan

May 15, 2012

Dear Japanese Friends,

I would like to take this opportunity to express the appreciation of the people of the Islamic Republic of Pakistan to the people of Japan for their kindness and support. The Government of Japan has always been at the forefront to contribute to the recovery and rehabilitation efforts whenever Pakistan has faced catastrophes such as the earthquake in 2005, and the floods in 2010 and 2011.

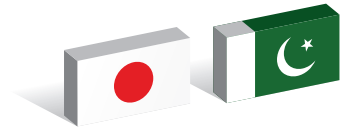

On behalf of the people of Murree, I would like to thank the Government of Japan for implementing 4 important rural water supply schemes through a Japanese NGO, Japan Mine Action Service (JMAS), to provide the people of the Villages of Kakrai, Badihar, Kohati, Luss Kohtar, Gehel, and Sihanna in Tehsil Murree, District Rawalpindi, with safe and clean drinking water. This area was facing an acute water shortage and the women in these villages were spending 2 to 3 hours to bring a bucket of drinking water from the springs to their homes; this time has been reduced to less than 30 minutes after implementation of the water supply schemes.

We are touched that the Government of Japan chose to provide resources to alleviate the problems of the people of these remote villages in Pakistan, and the implementation of these schemes has created an honoured place in our hearts for the people of Japan. Our prayers are for the Japanese people and this gesture of goodwill will go a long way towards strengthening the relationship between the two nations and their people.

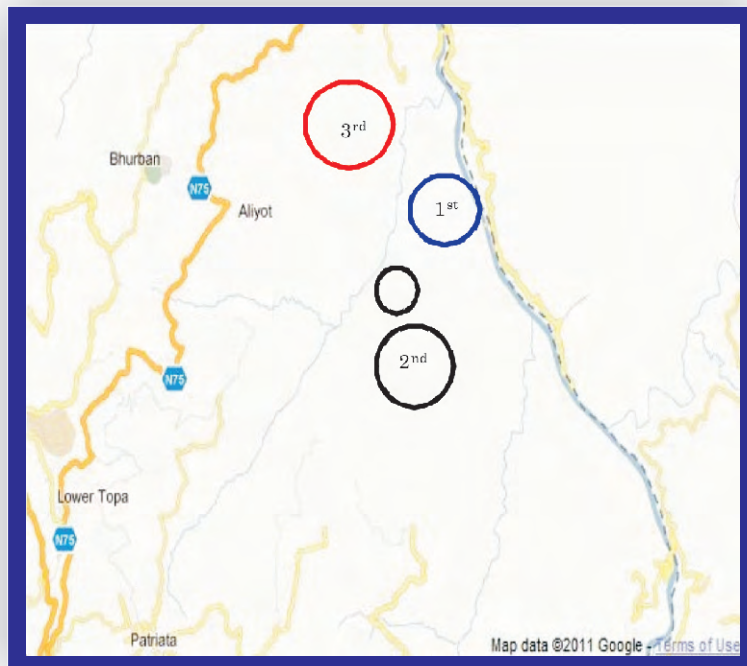

I would especially like to place on record our appreciation for the contribution that the JMAS team have made to ensure the timely and successful implementation of these projects.

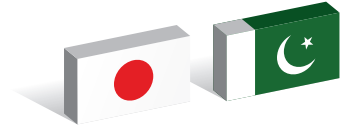

Yours sincerely,

House 4, Street 17, F-7/2, Islamabad  
Mobile: 0300-828 2942 email: shahid@airblue.com

# Letters of Appreciation from Water Committee

JMAS کو واٹر سپلائی پروجیکٹ نصب کرنے پر چار گاؤں سے حُسن کارکردگی کے 6 خطوط موصول ہوئے۔ جن میں خواتین نے بھی اظہارِ تشکر کیا۔ JMAS واٹر سپلائی پروجیکٹ کی کاوشوں کو سراہتے ہوئے یہاں کی مقامی واٹر کمپنیوں اور مقامی افراد نے اس امتیازی کارکردگی پر جاپان کی حکومت اور پوری جاپانی قوم کا شکریہ ادا کیا۔

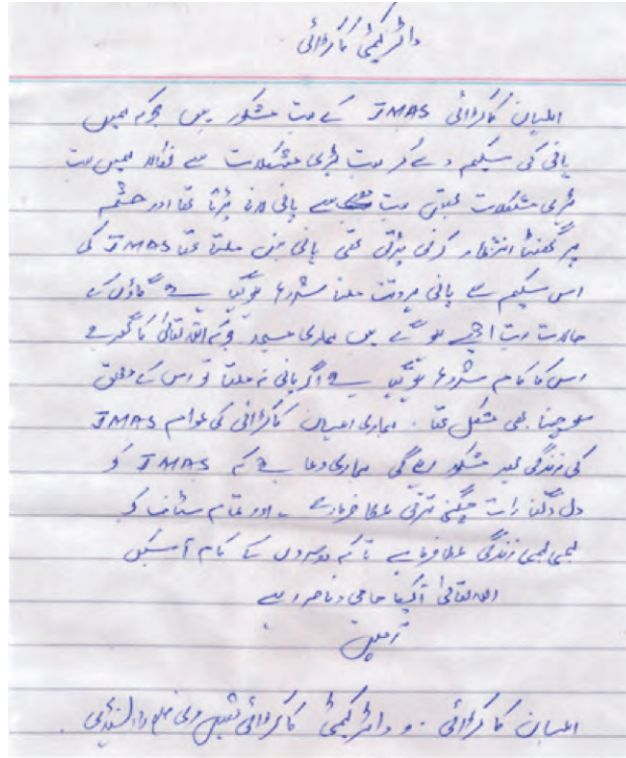

JMAS has received 6 appreciation letters including women from 4 villages where are implemented water supply project. Several Water Committees on behalf of residents desired to express appreciation to Government of Japan and People of Japan through JMAS.

*Thank You*

## From Kakrai village

All Villagers of Kakrai are very thankful to JMAS. JMAS eliminates big difficulties after the implemented water supply scheme.

We, people, were facing the great trouble. We had to bring the water faraway and also we had to wait one hour for water even some time we could not get the water. But after the JMAS project or scheme, we always get the water. Now, the condition of village is very good.

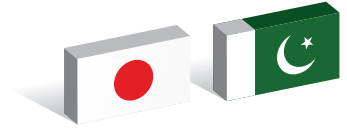

Now we start to build our Mosque work. If there is no water, it is very impossible. We, people of Kakrai, are appreciating to JMAS for whole life and pray for JMAS day and night for their prosperity and for their good future.

God give long life for JMAS staffs that help others.

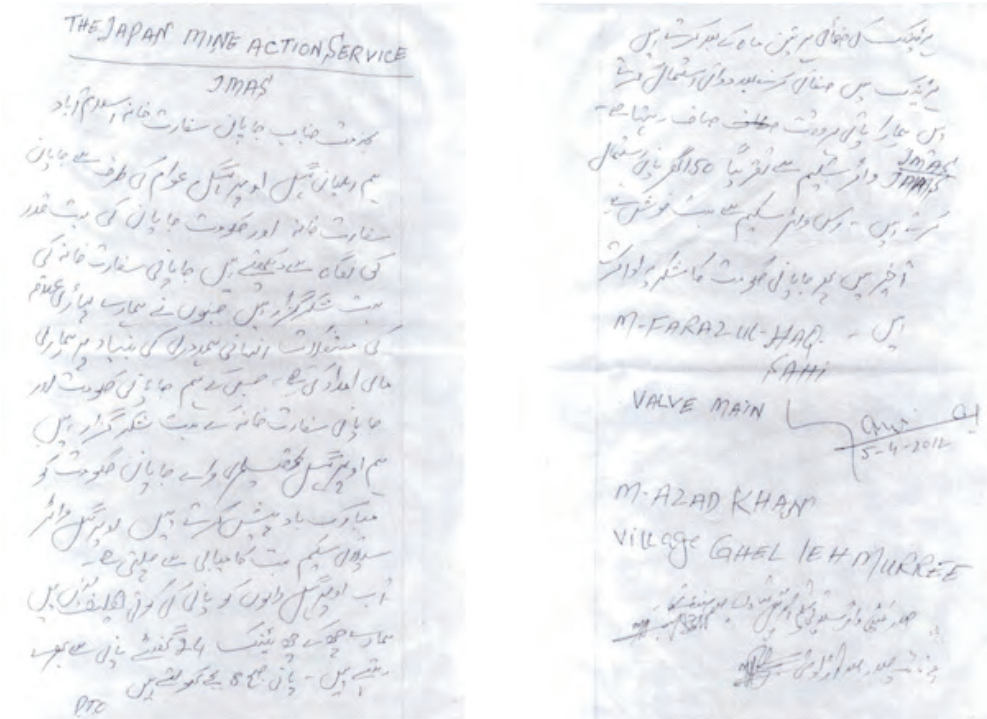

God bless you.

Ameen.

From  
Water Committee of Kakrai  
Tehsil Murre ,District Rawalpindi

## From Upper Gahel 1

### The Japan Mine Action Service JMAS

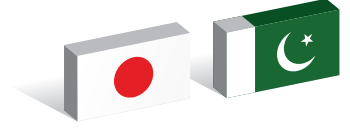

With due respect Embassy of Japan Islamabad. We resident of Gahel and upper Gahel thanks and appreciate to Embassy of Japan and Government of Japan which they understand the problems of hilly area and help us for the sack of brother hood to provide the fund to us. We people really appreciate to Government of Japan and Embassy of Japan. We, people of upper Gahel, must say congratulate to Government for upper Gahel water supply scheme successfully.

Now we, resident of upper Gahel people, have no shortage of water in our 6 tanks and the water is full in 24 hours. We open main water valve at 08.00am every day. Each tank is cleaned by us every 3months. We use the medicines after the cleaning. Our water is always clean.

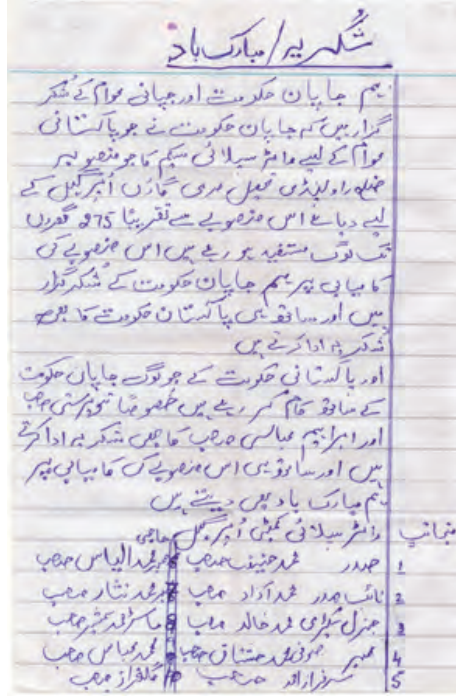

The beneficiary of JMAS water supply scheme is 150 houses.

All villagers of upper Gahel is so happy with this scheme and we are really appreciate to Government of Japan.

## From Luss Khotar

To,  
The Japan Mine Action Service

Sir, It is related that we the inhabitants of Luss Kothar are most thankful of the Japan Mine Action Service for fulfilling the lack of drinking water for the whole villagers of Luss Kothar and completed this project with his own expense. We are fully satisfied with their effort and labour. Now it is our duty to use this facility according to our needs. We should consider about our villagers needs of water and should use the proper quantity of water. As the water is one of the blessings of God. Therefore we should be thankful to God to achieve this blessing we should also care for the cleanliness of the water far and ever.

In the end the committee and the villagers are again much obliged to this faithful organization

Thanking you in anticipation

Zafer Abbasi

## From Sihanna 1

To:

The Japan Mine Action Services.

With the complement of the people of Village Sehanna-Tehsil Murree to JMAS-JAPAN

Water is the most important and necessary for the life of human beings, animals and vegetation.

Since, the olden times our villagers used to bring water far away from the fountain for their use, which was very troublesome to inhabitants.

Now with your sympathetic efforts we got water through pipes up to our houses, therefor we the people of the village pay the best tribute from the core of our hearts to our benefactors and express gratitude to people of Japan and the embassy in Islamabad for the invaluable help rendered in this respect. We also assure you that our future generation will also be obliged and appreciate your scheme.

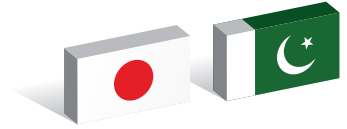

With all the Best Wishes.

## From Sihanna 2

We The people of Sihanna are very thankful to the Japan Govt, Japanese people and especially "JMAS" and his working body. That they paid their precious and sympathetic attention towards our very critical and longlasting issue that is water shortage.

Before this the population of Sihanna were in crucial shortage of drinking water. We were badly suffering from this problem, especially women were facing a lot of trouble. They walk miles and miles away for fetching drinking water on their heads. The children of this village were also suffered from these problems.

We The people of Sihanna are fully satisfied, delighted and feels a lot of relief from this fruitful project, especially members of Sihanna are very delighted and say thanks to Japanese Govt, Japanese people and "JMAS" for their untiring efforts to solve this major issue of water shortage issue.

Japanese Govt and "JMAS" showed their true and sincere sympathy to human being, all over in Pakistan. Japanese are playing a vital role to make a strong and prosperous Pakistan.

We, The people of Sihanna are

determined to manage every type of arrangement to make this project more successful and fruitful. We will make all possible efforts to keep water tanks safe and clean, and we will make a working body to secure this project for long long time.

Thanks  
people of Sihanna.

# Instruction of Water Facility

## Fairness, Justice, Rule of Law

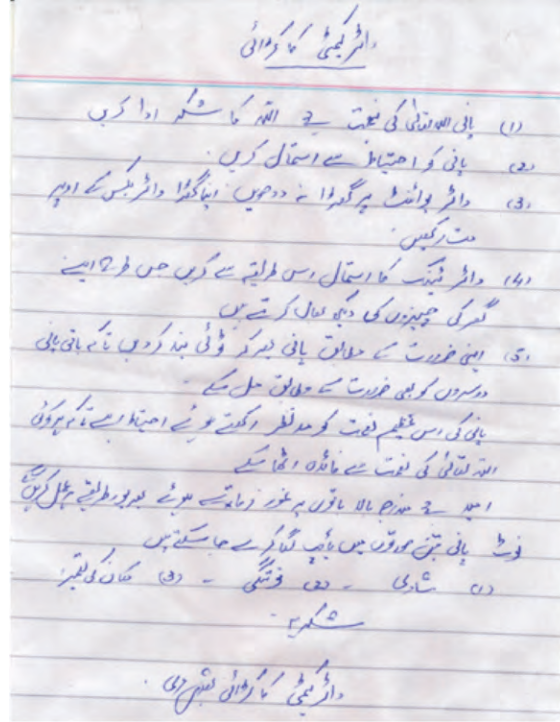

## Water Committee

## Kakrai village

### Instruction for Water Facility

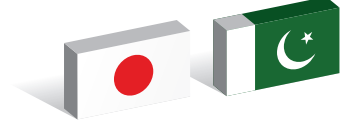

1. Water is great invention of Allah so that we must use it very carefully and appreciate with Allah
2. Water pot must not be washed here and users must not put it on a tap protection box which is made by stainless steel. Users must use a water facility very carefully like your own kitchen stuff.
3. Users take water properly, and then shut a tap for others. If someone would not shut it adequately, Water Committee (WC) will deprive him/her of some foods as punishment. If he/she does the same action twice, WC will take legal measure.
4. All villagers must keep in mind of the importance of this invention by Allah. You need to consider other users when you use water.
5. WC expects that all residents understand this instructions and every single person uses water facilities very carefully.

Exceptional rule.

WC will allow you to lay the pipeline from tank to your residence as below;

- Wedding Ceremony
- Funeral
- Celebration of new house

Water Committee in Kakrai

## Upper Gahel village

پانی استعمال کرتے وقت درج ذیل باتوں کا خصوصی دھیان رکھیں۔

پانی اللہ تعالیٰ کی عطا کردہ نعمت ہے۔ اس کو ضائع ہونے سے بچائیں۔ پہلی ٹینکی کانلکھ جو کہ واٹرسورس کے قریب نصب ہے صبح 8:00 بجے کھلتا ہے۔ استعمال کے بعد نل کو اچھی طرح بند کر دیں۔ اور برائے مہربانی اس پانی کو گاڑیاں دھونے کے لئے ہرگز استعمال نہ کریں۔

منجانب: گہل پانی کمیٹی۔

### The rule of water facility management

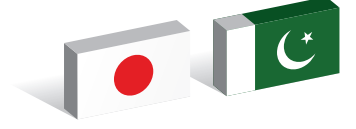

Water was given by Allah as gift so, do not waste water.

Main valve of 1st tank which is located in nearest water source is open at 8 o'clock.

Close the tap after draw water from water facility.

Do not be washed your car by water in the tank near the road.

استعمال کے بعد نل کو اچھی طرح بند کر دیں

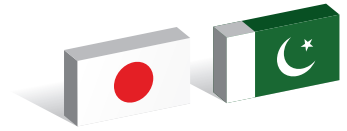

منجانب بس کوٹھار پانی کمیٹی۔

### The rule of water facility management

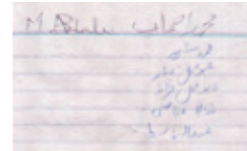

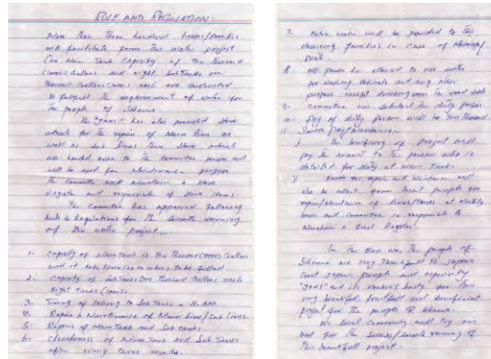

Water was given by Allah as gift so, do not waste water.

Close the tap after draw water from water facility.

### Water Committee in LussKhotar

## Sihanna village

### Rule and Regulation

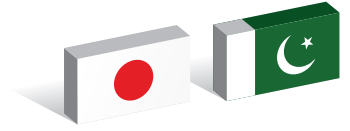

More than 300 houses/families will facilitate from this water project. One Main-Tank capacity of 10,000 gallons and 8 sub tanks are 1,000 gallons each are constructed to fulfil the requirement of water for the people of Sihanna.

The “JMAS” has also provided store articles for the repair of main line as well as sub-lines. These store articles are handed over to the committee person and will be used for maintenance purpose. The committee will maintain a stock register and responsible of store items.

The committee has approved following of rule and regulations for the smooth running of this water project.

- 1- Capacity of main-tank is 10,000 gallons and it takes time (25 to 30 hrs) to be filled.
- 2- Capacity of Sub-tanks 1,000 gallons each 8 tanks.
- 3- Timing of delivering to sub tanks – 8.00am.
- 4- Repair and Maintenance of Mainline/Sub-lines.
- 5- Repair of Main tank and Sub tanks.
- 6- Clean of Main tank and Sub tanks after every 3 months.
- 7- Extra water will be provided to deserving families in case of marriage and death.
- 8- No person has allowed to use water for washing vehicles and any other purpose except drinking near the road side.
- 9- Committee has selected 2 duty persons.
- 10- Pay of the duty person will be 10,000.
- 11- Source pay/ Maintenance
  - i The beneficiaries project will pay the amount to 2 persons who is detailed for duty at main tank.
  - ii Funds for repair and maintenance will also be collect from local people for repair/maintenance of lines/Tanks at monthly basis and committee is responsible to maintain a fund register.

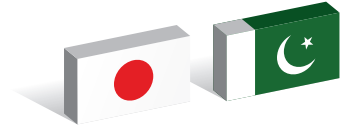

In the end, we, the people of Sihanna are very thankful to Japanese grant. Japanese people and especially “JMAS” and its workings body for this very beautiful, fullfill and beneficent project for the people of Sihanna. We local community will try our best for the success/smooth running of this beautiful project.

## Water Purification Tablets

## Acknowledgement

Through these three projects, it is result of support of many people around me.

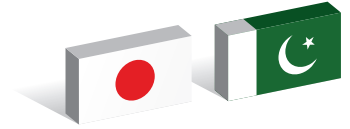

First of all, I am honour and glad to contribute the people of Pakistan to improve the standard of living as a staff of Japanese International NGO "JMAS". I had felt strong ties "KIZUNA" between Japan and Pakistan when Japan has been catastrophic damage by biggest earthquake and tsunami on 11th March, 2011. Many villagers who live in implemented/current project sites called our national staff. They were worried about Japanese staff families and the people of Japan. They always said "We are with you" and others said "we can do whatever Japanese brothers want to do". I had been impressed by their offer. Even our project scale was not so big as compare to Japanese Grant Project. I also appreciate to residents to cooperate with us.

Secondly, We, JMAS, have to express appreciation to Embassy of Japan to Pakistan and Government of Japan. They gave us remarkable opportunity through Grant Assistance. Particularly, Mr. Akira Goto who were in charge of NGO activities in Pakistan always assisted and advised us from beginning of project.

Thirdly, I would like to express appreciation to Japan Mine Action Service (JMAS) to give me great opportunity to join the field. I had desired to work in the field after graduated University in the U.K. When I joined in this field, I do not have any experience in this field. However, all staffs of JMAS, especially Mr. Takayasu Kakehi (ex-representative to Pakistan), Mr. Fumitoshi Takakura (Representative to Pakistan), Mr. Keisuke Yokoyama (ex-colleague) and Mr. Fukuro Kakizawa (Colleague) have coached and supported me in various fields for these projects. In addition, our National Staffs, Mr. Tanveer Satti (Administration Officer) and Mr. Muhammad Ibrahim Abbasi (Project Manager) always support project and me. I have to express my appreciation to them.

Finally, I would like to express my acknowledgement to my wife, Kumi and my daughter, Aiko. She understands and supports me whatever I want to do in anywhere.

## Japan-Pakistan Friedship Zinda Bad

Japan Mine Action Service (JMAS) has already implemented 3 drinking water supply project in the rural area of Teshil Murree, District Rawalpindi, Province Punjab for improving standard of living for the people of Pakistan.

JMAS has constructed water supply facilities, which have been sponsored by the Government of JAPAN as grant assistance, in Kakrai, Gahel and LussKohtar, and Sihanna from 2009 to 2012.

JMAS hopes to keep good relationship between Japan and Pakistan. In addition, JMAS wishes friendship between the people of Japan and the people of Pakistan will be strengthened and developed by both nations as neighbourhood forever.
